

2/18/2020 Project Meeting Minutes

Project Roles:

- Project roles pretty much stayed the same as when they were assigned
- Our Kanban on freedcamp.com has our tasks and who is assigned to each task
- We will change roles and teams as we go
- We will see how teams work for the first week and then we can switch up or keep teams based on how people work with each other

Database We are Using:

- MySQL

Federated Identity Service:

- We are submitting a form to request access to use IdentiKey's to login to our service
- If this does not work, we can hard code in emails to use that will pass the login page
