April 1st, 2020 Meeting Log

Update/Progress:
- Working on queries and displaying list of items initially on search item page
  - A list of items will be displayed initially on the page before a user searches and filters through items
- Updated "Tags" section on search item page
- The front-end of the form on the add item page is finished and it is connected to the database
- We need to update the pages on Firebase

List display on search page:
- Only 5 items displayed on page at any given time
- Or not giving results unless you have a tag applied

To-Do:
- Display items on search item page and update the front-end for those items
