**2/23/2020 Project Meeting Minutes**

Homepage:
- Homepage is finished
- We planned out the different pages for our app and the inclusion of a navigation bar

Database:
- We have decided to use MongoDB for the SQL
  - Have a NoSQL
- We discussed the organization of the database and how to organize/sort through information
- We also discussed the process of accepting or declining requests for more information
- We will have users enter in key words to categorize the items

Add item page:
- It will be a form
- Things to include in the form
    - Contact info of person who found item
    - Title
    - Summary
    - Location
    - Color
    - Date Found
    - Tags (allow up to 15 tags)
